

-Precondition: Need file upload permission and all module rights
-Need to check with on details view from file upload and overview, on Quick view from add file and related all for Deal/Activity/Company/Contact
-Need rename on detailspage overview

Drive

- Check with Salesmate all rights
- Check with Google all rights
- Check this not configured account with Salesmate, Removed app from drive ask permission for attach, deleted then opened accounts list page, only single time permission and this account is not added in salesmate
- Check this configured account with Salesmate, Removed app ask permission for attach, deleted then opened accounts list page, only single time permission
- If multiple accounts login then take first/default one every time, user is able to use one account at a time that is default to user another have to signout, If not login any account then ask to login
- Check who can see and security
- Change cross sharing rights - from Salesmate to Google, From Google to Salesmate
- Change same sharing rights - from salesmate to salesmate, From Google to Google
- Check sharing rights from off to on then off then no salesmate user can access this
- Delete attached file from Salesmate or Google
- Rename file name
- Edit file details
- Move between folders having or not permission
- Add/Remove star
- Manage version
- Add own file or shared with me user file
- Check all file type ex zip,rar,excel and size select 4 gb file with 4 files all have separate logs on salesmate map, form type
- Checks this with personal email, Domain email id
- Check this empty user sharing list of Google
- Check this with other shared user of Google
- Check this with salesmate shared user of Google
- Check with mix shared user of Google
- if google rights apply then don't override it
- after attaching file do app enable or disabled
- after adding file active/edit/Delete existing user or inactive/deleted/edit existing user or add new user or unconfirmed User
- Change records rights so that User is not able to see it
- Check download for normal attachment and google view on drive attachment
- Check if file is uploading from drive then check wait msg
- Check if multiple accounts then need to sign out from one account then can use second one
- If using another account than configured then don't add in salesmate
- open file with different login has not google account permission
- check time line entry

Test data

Self-Public-NotShared-PrivateEmail -- with edit and salesmate comment/read then edit, with Comment and salesmate Edit/Read then Comment,

If sign in not then it is opened google drive directly
Selection picker has problem
Rights is not applied on upload file
Share is disabled in small popup (not)
If select popup is opened and in between if account has attached then there some
issue is displayed
If time line off is removed from next time so not tested

Add test case for on click link of configuration page link is not given
